

IP 2406 photogloss paper is a high-gloss paper intended for indoor applications only. This material has been specifically designed for digital printing on large-format inkjets and is suitable for printing with eco solvent and solvent inks as well as UV-cured inks.

## IP 2406

IP 2406 photogloss fine art paper, treated with an ink receptive coating to make it suitable for eco, mild, and full solvent inks, is the leading material in digital fine art printing for exclusive computer generated photographic artwork or wherever a high-gloss paper is required. IP 2406 photogloss fine art paper also appeals in digital images due to their large colour gamut, high black value and the wonderful feel of a mould-made rag paper. Common applications include photographic fine art print reproduction, business cards, greeting cards, post cards, menu and novelty applications and presentational prints for displays.

Specifications	
DESCRIPTION	Photogloss paper
COLOUR	White high-gloss
THICKNESS	245 $\mu$
WEIGHT	260g / m <sup>2</sup>
ADHESIVE	N/A
RELEASE PAPER	N/A
TEMPERATURE RANGE	N/A
DURABILITY (UNPRINTED)	N/A
FLAME RETARDANCY	N/A
SHELF LIFE	2 years, 20°C / 50% humidity
RECOMMENDATION	For optimum quality, please ensure that the media feed adjustment has been completed for this material
